

The feedback from the client, Maria Musialik, on the 11th of June 2023

Bartosz Bielawski: *Good afternoon, Ms. Maria.*

Maria Musialik: *Good afternoon.*

BB: *Last time we met I provided you with the application. What is more, I saw your text message as well and that is why I wanted to contact you and meet.*

MM: *I understand. Since I was using the “Tick Off Time” for a week I have to admit that I am impressed by the effort you put into creating it. As I said last time, I know little about such things but I am quite certain that it must have been a challenge, wasn't it?*

BB: *Yes, it was. Thank you for your kind words. Anyway, in your next message, you mentioned some difficulties while using it. Where was the problem?*

MM: *I have already created around 30 tasks during this week and one day I had to do more things than usual and I noticed that some tasks in the first menu are not fully shown. I did not know why. I could only see a part of one task at the bottom but I could not “get to” others. What is more, when I was searching for a task, I chose all the features I wanted to take into account and I clicked the “Search” button. However, I realised that I entered the wrong name by mistake and I wanted to return to change it quickly but then I had to enter everything again. It was a little bit frustrating. Luckily, there are not so many options.*

BB: *Thank you for drawing my attention to these problems. I have not tested the application with such a number of tasks to do. These problems, as you said, might be very frustrating and it is definitely an issue that should be fixed instantly. I will take it into consideration. Is there anything else?*

MM: *I have not found any other problems yet.*

BB: *And what about your opinion about the app? Did it fulfill your expectations? Is there anything that you would like me to improve or implement?*

MM: *My opinion is already familiar to you because I told you I was thankful for your help and impressed by your work. In the case of expectations, it definitely fulfilled them. However, I know I cannot leave you with such an answer so I will describe to you the ideas that have come to my mind during this week. Firstly, it would be awesome if I could adjust all tasks and categories by myself. I mean, you mentioned once that they are sorted automatically but in some cases, it would be more comfortable for me to adjust them by myself. The order of tasks signifies the order I will do them so it definitely should be set by me. And my second idea is to improve the design of the whole app. I do not want to sound mean but it should be more visually pleasant although the app was supposed to be minimalistic. It could look more professional. I think you know what I mean.*

BB: *Yes, I do. That was the issue I was facing while working on the app. I am not a graphic designer but I can agree that it could look better. Regarding your first idea, it would be very interesting and convenient for you, as a user. Is there anything else?*

MM: *No, I think I said everything I wanted to say.*

BB: *Alright. If you find any other issues or think up other ideas, please contact me as soon as possible. I will do my best to assist you.*

MM: *Thank you very much for your help and of course, for your app.*

BB: *I also thank you for your feedback. I hope the application will benefit you. Goodbye.*

MM: *Goodbye.*
