

CRITERION E: EVALUATION

Evaluation of the product

Success criteria	Met/partially met/not met	Description
The app contains a logo	Met	The logo of the app appears as an icon on the screen of a smartphone.
A user can enter the name of a task	Met	A user can enter the name of a task in the “Creating a task” menu.
A user can choose a category affiliation for a task	Met	A user can choose a category in the “Creating a task” menu.
A user can choose a type of task from: Single task - repeated only once Until task - repeated from one day to another until it is done Repeat task - repeated every chosen day	Met	A user can choose a type in the “Creating a task” menu. All 3 types work as they have been planned.
A user can choose a start day and a deadline for a task	Met	Depending on the type of task, a user can choose one or two dates in the “Creating a task” menu.
A user can enter the description of a task	Met	A user can enter a description in the “Creating a task” menu.
A task is saved	Met	A created task is saved and displayed correctly depending on its features.
A user can enter the name of a category	Met	A user can enter the name of a category in the “Creating a category” menu.
A user can choose the colour of a category	Met	A user can choose a colour in the “Creating a category” menu.
A category is saved	Met	A created category is saved and displayed correctly in the “List of Tasks” menu.
Having clicked a day in the “Calendar”, all assigned to this day tasks appear	Met	In the “Calendar” menu after clicking a day, all tasks assigned to this day appear.

The “Calendar” presents a monthly view	Met	There is an operational calendar presenting a whole month in the “Calendar” menu.
The starting position of the “Calendar” is the current month	Met	The calendar in the “Calendar” menu starts always from the current month.
A user can navigate to other months in the “Calendar”	Met	The arrows next to the name of the current month allow a user to proceed to different months.
Tasks are grouped into categories in the “List of Tasks”	Met	In the “List of Tasks” menu there are all created categories and after unrolling all tasks assigned to that category appear.
Tasks are displayed in a colour based on their type in the “List of Tasks”	Met	There are 3 possible colours a task can have in the “List of Tasks” menu: yellow, light blue, and purple. Depending on the type, a task is displayed in one of these colours.
Tasks can be deleted by a user	Met	In the “Editing a task” menu, a user can delete a task after a confirmation.
Features of tasks can be edited	Met	Having clicked a task’s name, a user proceeds to the “Editing a task” menu, where they can edit each feature of the task.
Features of categories can be edited	Met	Having clicked a category’s name, a user proceeds to the “Editing a task” window, where they can edit each feature of the category.
Categories can be deleted by a user	Met	In the “Editing a category” window, a user can delete a category after at least one confirmation.
There is a view of tasks assigned to the present day	Met	In the “To Do Today” menu only those tasks are presented that are assigned to the present day.
There is a view of tasks assigned to the present week	Met	In the “To Do This Week” menu only those tasks are presented that are assigned to the present week. Moreover, they are grouped based on the day of the week.
There is an option to filter tasks based on the chosen features	Met	The “Search” menu allows a user to find tasks based on the chosen features.
A task should be red and bolded in case of the coming deadline for it	Met	Tasks for which the deadline is the next day are red and bolded in all menus except the “List of Tasks” menu.

In case of an undone task after its deadline, it should become red	Met	Tasks that have not been done on time are red in all menus except the “List of Tasks” menu.
The app does not archive done tasks (The finished task must be deleted)	Met	Deleting a task or a category is permanent and it cannot be undone.
The design of the app is minimalistic and manageable	Partially met	In some cases, it is ambiguous what a user should do.

Recommendations for the future development of the product

Having familiarised myself with the feedback, I obtained the information about the features that should be developed in ms. Musialik’s opinion (the feedback is contained in the appendix):

Scrollable columns in all menus

Due to the systemic difficulties in displaying a scrollable column with filtered elements, in some menus, not all tasks/categories/options are visible. Fixing this issue will benefit the interface and functionality of an app, which will please a user more.

More flexible adjustment of categories and tasks

A user could be able to adjust categories or tasks by themselves regardless of systemic conditions. It will provide more personalised and effective management for a user.

More developed design of elements

The design of tasks, categories, menus, and bars could be improved to make it more visually pleasant. A user will be pleased due to the app’s more aesthetic design, which will affect the user experience positively.

Saving the previous adjustment after returning from a different menu

After returning from a different menu a content/adjustment (e.g. unrolled categories, chosen features in the “Search” menu) a user “left” could be saved. Improving this will benefit the user experience, usability, and efficiency.
